

Microsoft (MSFT)

Investment Research — Summary Report

Investment Summary

Microsoft combines a resilient enterprise software franchise with a rapidly expanding cloud platform. The investment thesis is centred on Azure growth, monetisation of AI services and the durability of recurring enterprise revenue.

Investment Thesis

- Azure remains the principal structural growth engine.
- AI products can increase revenue per customer across the Microsoft ecosystem.
- Recurring software and cloud revenue support strong cash generation.

Potential Catalysts

- Accelerating Azure growth
- Copilot monetisation
- Operating leverage from scale

Key Risks

- Higher AI infrastructure spending
- Cloud competition
- Slower enterprise IT budgets
